

Floor Scrubbing – Automatic Machine

PURPOSE:

To provide a clean, aseptic and attractive condition to all resilient tiled or hard surfaces, such as terrazzo.

REQUIRED SUPPLIES & EQUIPMENT:

- Automatic floor machine with pad drive assembly or brushes
- Set of “Wet Floor” signs
- Floor pads
- Putty knife
- Dust mop
- Dustpan and brush
- Approved cleaning detergent solution appropriate to the area

PROCEDURE #3

- A Prepare equipment – Fill solution tank with correct cleaning detergent solution. Transport to work site.
- B Prepare area – Set up “Wet Floor” signs. Move obstacles such as furniture.
- C Dust mop floor – Follow Procedure #1. Use clean dust mop.
- D Scrub floor – Use light brush pressure and scrub with the squeegee down – single scrub. Shut off solution a few feet prior to making any turns. Remove any puddles with wet mop or squeegee to a point that can be reached by the automatic machine.
- E When floor has dried – Remove signs. Return furniture and other items to proper locations.
